

A house doesn't build itself.

# It takes quality construction and thoughtful development.

**Kingdom Zephyr Africa Management's investment funds have completed their EUR 45 million investment in Mixta Africa S.A., a pioneer in African affordable housing development and land transformation.**

In 2009, Mixta will complete a three year construction, land acquisition and development program in Morocco and Senegal that will produce over 6,400 new homes. Additional projects in Egypt, Mauritania, Algeria and Tunisia are also underway. Mixta's multi-country platform makes the company well-positioned to respond to the growing and unmet demand for housing within the surging African middle class population.

Kingdom Zephyr's pan-African investment strategy focuses on regionally expanding companies with proven management. Kingdom Zephyr will be an active shareholder assisting Mixta in meeting its expansion goals and work with management to improve operations.
